

Genetics Program

The Genetics Program works to improve the health of people with, or at risk of, genetic or congenital conditions by providing up-to-date and accurate information to individuals, families, and healthcare providers.

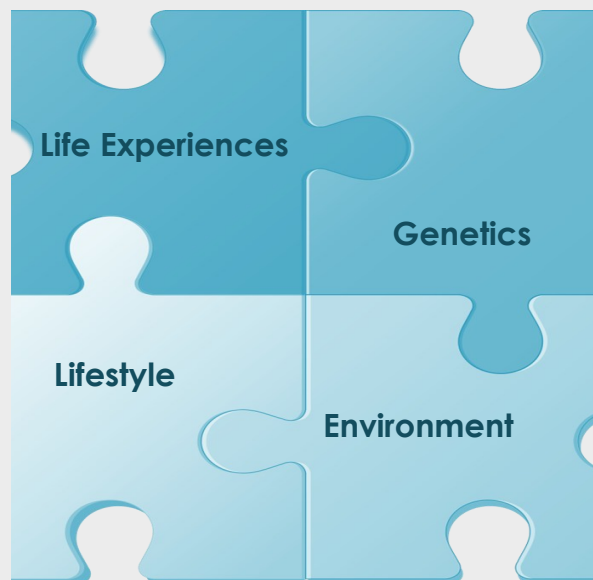

What We Offer

- **Partnership:** Understand your needs to develop effective strategies for collaboration and expanding access to genetic services.
- **Technical Support:** Provide information on genetic conditions, referral pathways, and guidance on when and how a referral to genetics might be helpful.
- **Education:** Offer tailored tools, fact sheets, FAQs or educational session for staff or community.

Available Resources

Find all of the Genetic Program resources on the [DOH landing page](#).

- Find a genetic provider through the [statewide directory](#).
- Learn more about why and how collect [family health history](#).
- [Prenatal Genetic Screening](#) information available. Video series in [English](#) and [Spanish](#).
- Learn more about [cancer genetics](#) (also in [Spanish](#)) and two genetic conditions: [Lynch Syndrome](#) and [Hereditary Breast and Ovarian Cancer Syndrome](#).
- Genetic Glossary available in [English](#), [Marshallese](#), [Russian](#), [Spanish](#), [Ukrainian](#), and [Vietnamese](#).

Health is influenced by various factors.

Understanding these interconnected elements can help families make informed decisions and access appropriate care.
