

# IE&E Program Overview

Healthier Washington Collaboration Portal

February 2026

# Overview

The IE&E Modernization Program is a multi-year effort to develop a modern, integrated eligibility solution for health and human services that best supports the needs of Washingtonians.

## Why IE&E?

### **The process of applying for benefits can be a challenging task.**

The Health and Human Services Coalition serves more than 2.9 million Washingtonians through over 75 health and human services programs. Over one million Washingtonians are served by programs from at least two HHS Coalition organizations.

Clients often must navigate multiple online systems and fill out duplicate and lengthy applications, some of which may not be easily accessible to those we serve. This can be particularly difficult as it may require clients to repeat their personal stories and provide the same information multiple times.

## Why IE&E?

The IE&E Modernization Program is set to alleviate these challenges by introducing a user-friendly application, implementing an HHS portal, and streamlining the process to obtain benefits. This would enable clients to access the services they need more efficiently.

In addition, the HHS Coalition organizations currently rely on a patchwork of IT systems, at its core, the Automated Client Eligibility System (ACES) – a 30-year-old mainframe system that uses legacy technologies. This reliance on legacy technologies limits flexibility for the state to respond to regulatory requirements, streamline processes, and improve access to benefits for Washingtonians.

**This is where the IE&E vision comes in.**

# IE&E Vision

We envision a world where Washingtonians tell their story one time as the new system and underlying business processes securely guide them through the possibilities.

This is made possible by providing a singular, easy, accessible and improved experience for clients and community-based assistors as well as an improved experience for eligibility staff and case workers.

# IE&E Program Office

---

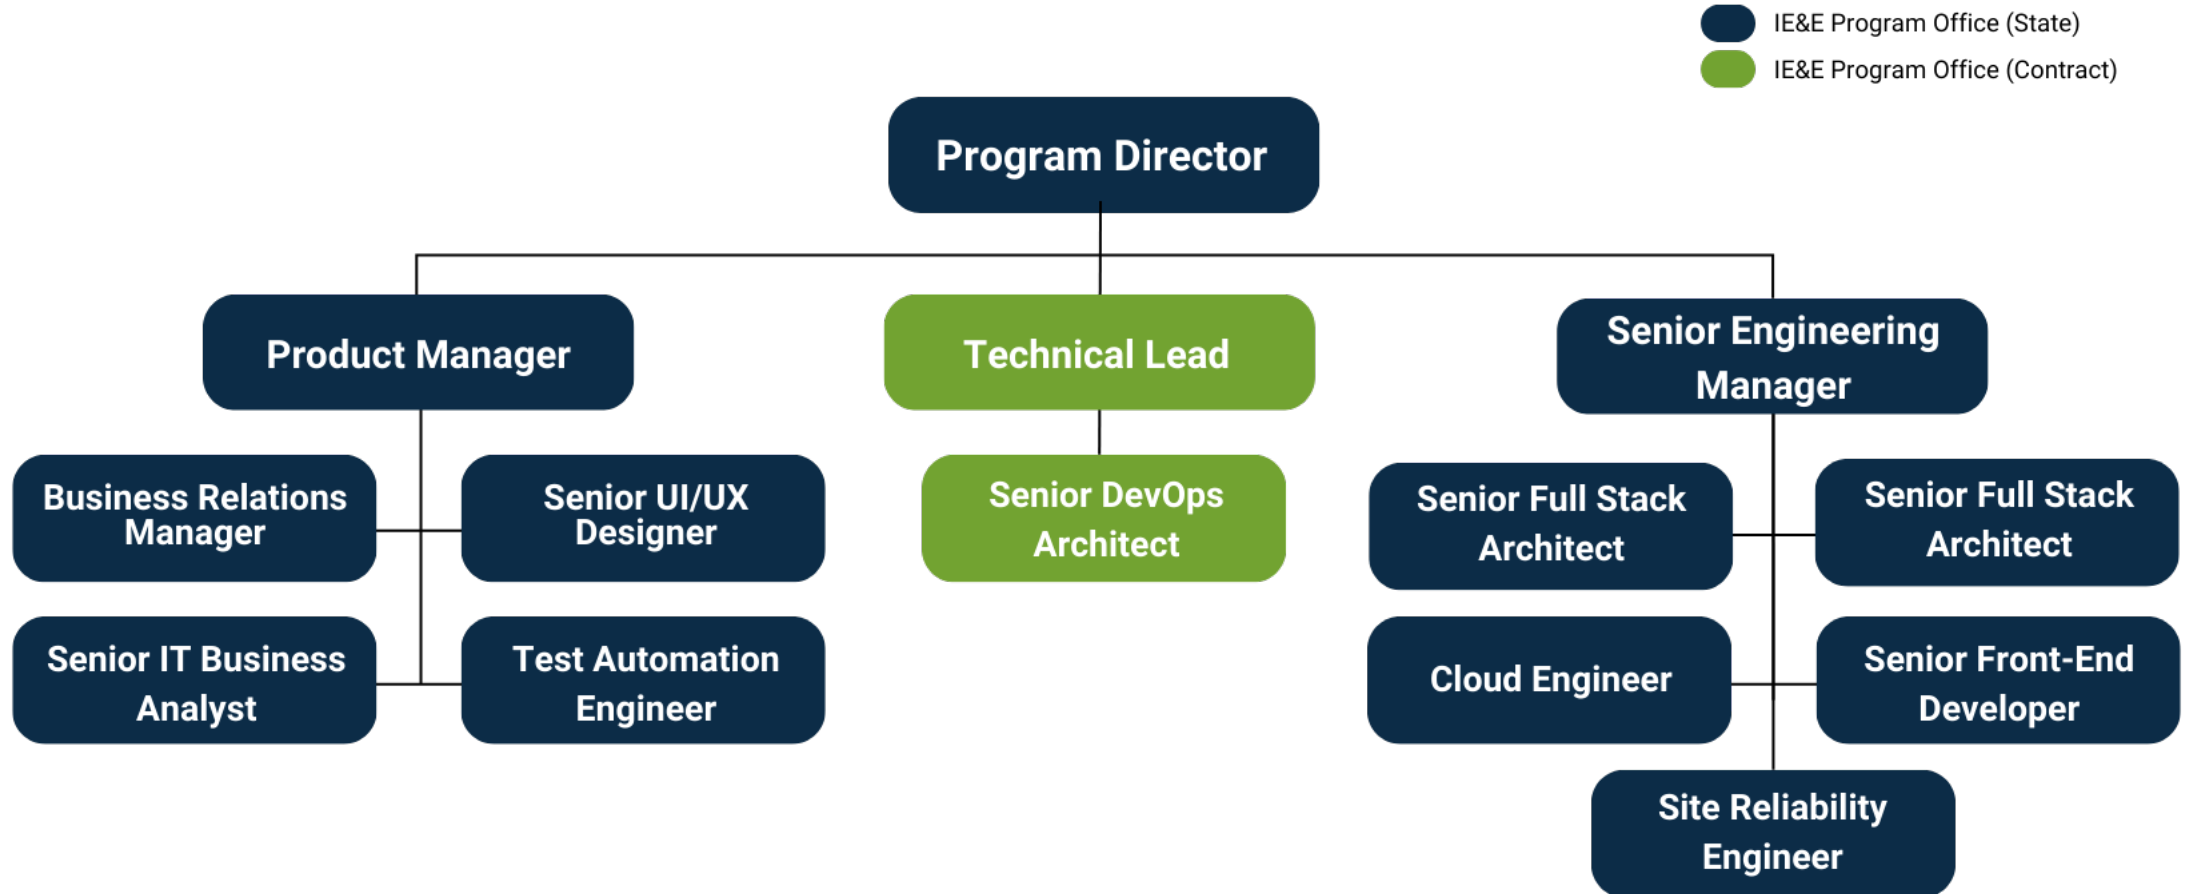

Washington State  
Health Care Authority

Under the oversight of the [Washington State Health and Human Services Enterprise Coalition](#) and the leadership of the Division of Information Technology within the DSHS Finance, Technology, & Analytics Administration, IE&E is responsible for full product management, operations, and technical oversight of MyWABenefits, DocUpload and the IE&E cloud platform.

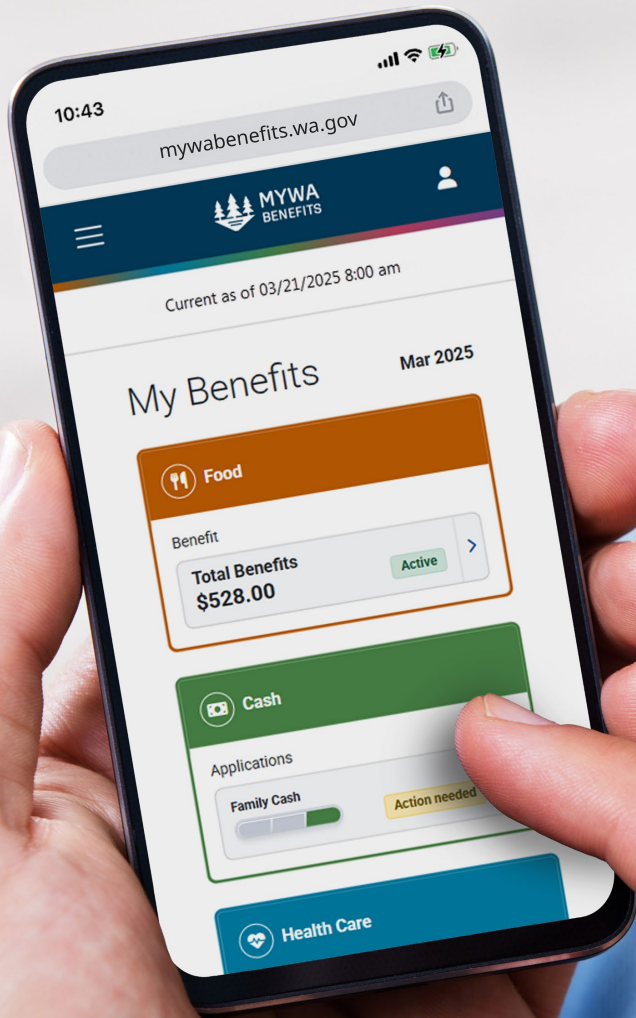

The team is also responsible for maintaining the IE&E roadmap, using an Agile approach to incrementally make progress through the implementation of products and capabilities that make up a comprehensive integrated eligibility and enrollment system.

# Program Office

# Current Products

---

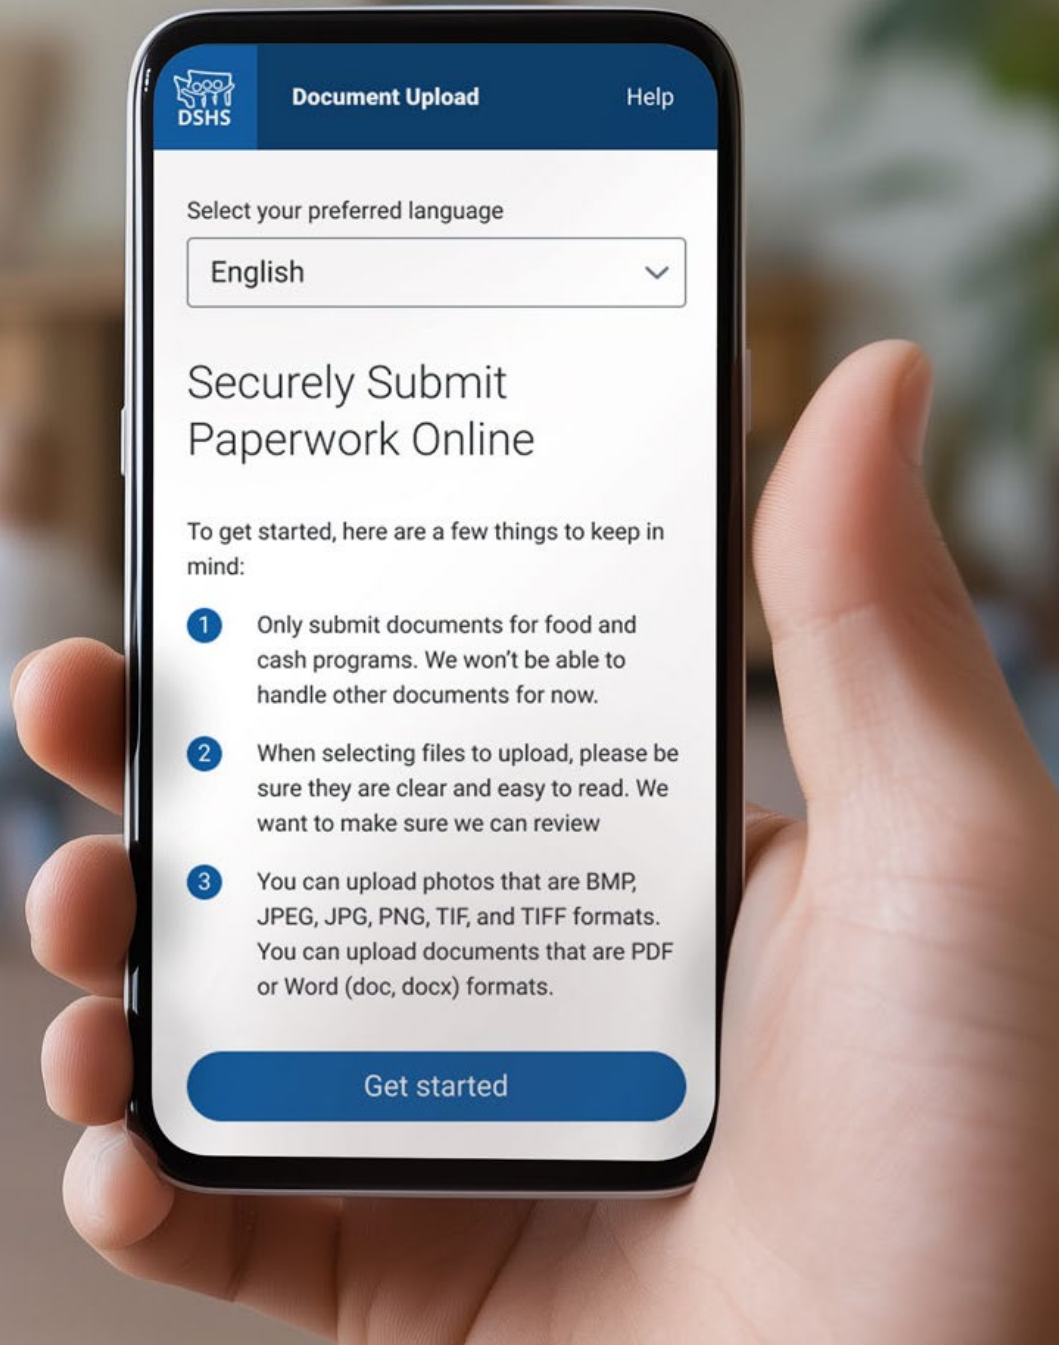

# MyWABenefits

A mobile-friendly, self-service portal to help households understand their eligibility and enrollment status across multiple programs.

# DocUpload

A secure, self-service online portal that allows customers to submit verification documents for eligibility determinations.

# Platform

The IE&E Platform provides infrastructure to support development of modern and integrated eligibility solutions.

# Completed Projects

---

# Stabilize and Invest in Current Systems

Project	Description	Completed
<b>Mainframe Stabilization</b>	Transition the Automated Client Eligibility System (ACES) mainframe to single, current database to support future modernization.	<b>August 2023</b>
<b>Mainframe as a Service Migration</b>	Secure mainframe technical services, prolong life of ACES environment and operations and transition to a fully hosted service.	<b>June 2024</b>
<b>Maintenance &amp; Operations Vendor Transition</b>	Procure the services required to maintain, operate, and provide enhancements to the ACES application.	<b>July 2024</b>

# Establish Modern Foundations

Project	Description	Completed
<b>Platform</b>	Establish a new, modern cloud-based platform for IE&E solution components.	<b>June 2024</b> (Initial launch)
<b>Technical Architecture &amp; Design</b>	Analyze modularity assumptions and design future state architecture that will be used to inform and update the IE&E Roadmap.	<b>September 2024</b>
<b>Master Person Index</b>	Create an authoritative method to identify people across HHS systems as a foundational IE&E component.	<b>June 2025</b> (Initial launch)

# Modernize IT Systems

Project	Description	Completed
<b>Customer Experience &amp; Innovation</b>	Simplify benefit application, renewal and correspondence designs.	<b>September 2024</b> (Designs only)
<b>HHS Portal Roadmap</b>	Create a proposed roadmap to establish a modernized and centralized portal to apply, renew and maintain HHS program benefits.	<b>January 2025</b>
<b>MyWABenefits</b>	Establish an eligibility and enrollment status tracker that provides a self-service, single point of access to understand application and benefit status.	<b>June 2025</b> (Initial launch)

# Looking Ahead

---

# What's next?

The HHS Coalition established a roadmap aimed at achieving a vision for IE&E in January 2022 and refreshed the roadmap in November 2024 through the Technical Architecture and Design (TAD) project. Since the refresh, the resources and funding for IE&E have significantly changed.

The IE&E team is currently leading the effort, working closely with HHS Coalition representatives, to revise the IE&E roadmap and prioritize the features and capabilities, which will help identify projects to initiate and implement within this biennium.

# Future State Business Capabilities

# Partnering with people

---

# Listening to experts

IE&E remains firmly committed to prioritizing human-centered design and enhancing the customer experience.

By working closely with staff, customers, advocates, community partners, and Tribal communities, our team effectively integrates lived experiences and customer voices into our products and services.

I work part time, so my food benefits fluctuate. Sometimes I don't know how much I'm getting until the day I receive them. I love seeing next month's benefits. It's so hard to plan when you don't know.

-Usability study participant

As a representative community, we're tired and worn down. It's already hard enough to navigate and trust the systems, so anything you can do to just make life easier goes a long way.

-Design session participant

It was easy to log in, and so far seems easy to use. Approachable and clear. Good job Washington!

-MyWABenefits user

I wanted to take the time to thank you. I don't know how to say it but I want you to know I appreciate your help. Have a great day.

-DocUpload user

We appreciate your interest in the IE&E Modernization Program and look forward to working together to improve access to health and human services for all Washingtonians.
